

Hand-In-Hand for Sustainable Seafood Packaging

Wax-free and water-resistant, Greencoat-coated boxes protect your seafood and fish products, the environment, and your bottom line.

Meet Greencoat - seafood packaging that emerged from five years of focused research and development. Built to be just as strong as wax curtain-coated boxes. Durable enough for your ice-packed seafood.

Greencoat delivers significant cost savings because it's less costly than wax and eliminates wax box waste removal fees. It can also be stored flat to save space, unlike expanded polystyrene (EPS) and Reusable Plastic Crates (RPCs). While these packaging materials can easily crack or break, Greencoat boxes stand up to the constant rigor of storage and shipping.

If you're shipping seafood, you need water-resistant packaging you can trust to deliver your products fresh from the catch to the customer. And you need a way to meet your customers' growing demands for sustainability.

BENEFITS OF GREENCOAT

Financial Benefits

- Costs less than wax boxes
- No expensive wax box disposal fees
- No sanitation fees

Environmental Benefits

- 100% recyclable
- Replulpable
- Reduced CO2 emissions
- Reportable in GRI G4-EN-1:
