

# Greencoat®: The Biggest Innovation in Packaging History

Sustainable, wax-free and water-resistant, Greencoat coated boxes are the ultimate solution to replace landfilled wax boxes, contaminated RPCs and non-biodegradable EPS.

We worked for five years to develop a box that goes beyond safeguarding your product to protecting the environment, too. A box that's not only 100% recyclable and repulpable but also affordable and strong.

Greencoat is heavily used by poultry processors, fresh produce growers and packers, and seafood, salmon and other fish processors. But this innovation is not limited to those industries; a range of applications exist for any company whose goods are transported and/or stored in moist conditions.

## BENEFITS OF GREENCOAT

### Financial Benefits

- Costs less than wax boxes
- No expensive wax box disposal fees
- No sanitation fees

### Environmental Benefits

- 100% recyclable
- Repulpable
- Reduced box room waste
- Reduced CO2 emissions
- Reportable in GRI G4-EN-1:
  - Renewable Materials
- Reportable in GRI G4-EN-32 and 33:
  - Supplier Environmental Assessment

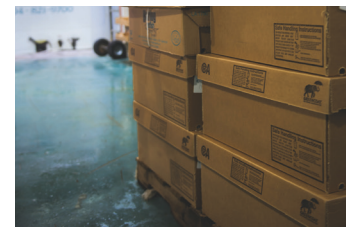

### Product Benefits

- Water-resistant
- Strong & durable
- Easier to glue than wax
- Customized for your needs

"It may seem unusual to get this excited about corrugated boxes, but we are thrilled to highlight these recyclable products. If we were to replace all the unrecyclable packaging used across the country for seafood, produce, poultry, and meats, it would be the equivalent of shutting down an entire coal-fired power plant with no loss of energy, and a tremendous gain in savings and revenue for grocers and restaurants."

Lily Kelly, Senior Program Associate
